

Hi.

I'm Brian. I work at the intersection of statistics, geospatial analysis, and data visualization.

Data scientist, applied statistician, and spatial analyst with 15+ years of experience finding the signal in a noisy world. Highly skilled in advanced analytical techniques—including contemporary Bayesian hierarchical models—that turn complex (and often messy) data into discovery. Passionate about conveying stories through high-quality graphics and cartographic design. Motivated by challenging problems and a desire to leave the world a little better than I found it.

I'm motivated by challenging problems and a desire to leave the world a little better than I found it. If you'd like to work with me, feel free to send me a message.
